Instrumentation Amplifier.
In biomedical applications,
high gain and the high input
impedance are attained with
an instrumentation
amplifier. Usually, a
3-amplifier setup forms the
instrumentation amplifier
circuit. The output from the
transducer is given as input
to the instrumentation
amplifier. Before the signal
goes to the next stage, a

Biomedical Engineering (BME) is a cross between engineering principles and biology and is used in designing healthcare-related initiatives. It combines the problem solving of engineering with biological principles to discover new medicines, build innovative therapies, and create new medical equipment that can improve our quality of life.
