based manuals, and placing and viewing CAD drawings online.

A complete reference that features a wealth of proven maintenance methods that can reduce energy use in any type of building. Provided are numerous forms and maintenance procedures for reducing energy use, improving system performance, and cutting total maintenance costs.

This manual has been prepared to serve as a guide for the operation and maintenance of the Lutheran Hospital Bicycle Trail Segment. Operations and maintenance instructions for the major features of the project are presented. This manual has been written for project and management personnel familiar with the project and does not contain detailed information which is common to site personnel or which is presented in other existing manuals or regulations. The intent of the operating instructions is to provide information which allows orderly and efficient use of the constructed features. The intent of the maintenance instructions is to present preventative maintenance information consisting of systematic inspections and subsequent corrective actions which should ensure long-term utilization of equipment and features. A timely preventative maintenance program reduces and virtually eliminates breakdown of essential equipment and prevents major damage to constructed features by early corrective action.
